Professional Summary

Aspiring software developer and Computer Applications postgraduate with a strong foundation in full-stack development, cybersecurity, and machine learning. Experienced in developing end-to-end web applications using Django, MERN Stack, and REST APIs, complemented by proven leadership, teamwork, and collaborative project experience through academic and NSS initiatives.

Skills

Programming: Python, C++, Java, JavaScript, SQL, HTML, CSS

Frameworks & Tools: Django, MERN Stack, Git, GitHub, Flask

Technical Skills: REST APIs, CRUD Operations, API Integration, Authentication, Responsive Web Design, Machine Learning, Cybersecurity

Databases: SQLite, MySQL, MongoDB

Soft Skills: Problem Solving, Leadership, Team Collaboration, Adaptability, Time Management

Experience

SwiftSafe

March 2026 – May 2026

Cybersecurity Machine Learning & AI Researcher Intern

- Worked on cybersecurity-focused research and development projects involving threat detection and attack prevention.
- Built security-focused projects related to remote access control, logging, and alert generation.
- Conducted research on common security vulnerabilities, attack patterns, and secure coding practices.
- Assisted in developing static-analysis-based security solutions and AI-driven security workflows.

Skyslit Network Private Limited

2024

- Understanding the functionalities of the web application development tool.
- Observing and assisting the documentation team while engaging in discussions regarding web application development workflows.
- Assisted documentation and project support teams.

Projects

SOUNDWAVE: Speech Assistance for People with Stuttering

Tech Stack: Python, ML, Dart, Flask

- Developed an AI-based speech assistance system for people with stuttering.
- Integrated speech recognition, next-word prediction, and text-to-speech techniques to improve real-time communication fluency and reduce speech interruptions.

Cybersecurity Monitoring and Incident Response System

Tech Stack: SIEM, Anomaly Detection, Python, Flask

- Designed a comprehensive logging and real-time alerting system.
- Implemented automated anomaly detection and centralized event monitoring to support faster incident identification and response.

REMOTECURE: Remote Access Control and Threat Mitigation Framework

Tech Stack: OpenVPN, RDP, Python, Flask

- Implemented a multi-layered remote access control framework using secure tunneling (VPN) and remote desktop protocols based on Zero Trust and Least Privilege principles.
- Integrated monitoring and threat mitigation mechanisms to detect unauthorized access attempts and improve secure remote connectivity.

Emotion-Based Music System

Tech Stack: Python, ML, OpenCV, Django

- Developed an ML-powered system that detects user emotion and recommends music.
- Integrated emotion recognition and personalized recommendation techniques to enhance user experience and adaptive music selection.

Delicious Food Recipe Web Application

Tech Stack: Django, SQLite, HTML, CSS, JavaScript, REST API

- Built a recipe platform with API-based calorie calculation.
- Implemented dynamic recipe management and responsive UI features to improve user interaction and accessibility.

Plant-Based E-Commerce Web Application

Tech Stack: MERN Stack, JWT, MongoDB

- Built a full-stack e-commerce platform with secure authentication and dynamic UI.
- Developed RESTful workflows for product management, user access control, and seamless shopping experiences.

Publications

Necrobotics: The Integration of Biotic Materials as Ready-to-Use Actuators and Chassis

IJARES, ISSN No: 2455-6211

Paper ID: IJ-2702261005

Sustainable robotics approach to repurpose biological remains involving biodegradable actuators and bio-inspired engineering systems.

Education

Master of Computer Applications 2024 – 2026

Nehru College of Engineering and Research Centre, Pampady, Thiruvilwamala
APJ Abdul Kalam Technological University(KTU)
CGPA: 9.59

Bachelor of Computer Applications 2021 – 2024

College of Applied Science, Perissery Kerala University
CGPA: 7.89

Senior Secondary Education 2019 – 2021

Amrita Vidyalayam, Thiruvalla
Central Board of Secondary Education

Certifications

- Microsoft Azure AI Essentials
- NPTEL: Database Management System
- Full Stack Development with Python & Django
- IBM Skill Build Program
- IHRD Tharang: Data Mining Workshop
- K-DISC Young Innovator Program

Volunteer Experience

National Service Scheme (NSS) 2021 – 2023

- Coordinated volunteer activities, awareness drives, and meetings.
- Participated in National Integration Camp and State-Level NSS Camp.
- Led awareness drives and social service activities
